Re: New sanitation and procedural policy implementation

Effective March 23, 2019 6:00pm all Fisherman's Market locations will adhere the following mandates.

- All processing of any seafood product will be done after or before operating hours.
 - o Locations will need to make staff scheduling changes to accommodate this
- No secondary processing of any sort is to happen before, during or after operating times.
- The sale of all live shellfish is currently ceased
- All stores have limited customer entry. Nelson, Kelowna and Kamloops all have a maximum capacity of two people. Gibsons and West Vancouver have a maximum of one person.
- Customers entering the store are told, without exception, that they must either wear gloves which we will provide or have the customer service representative do their shopping for them.
- All products must be labelled and ready for the till as to increase the speed with which the customer can exit the premises.

These implementations, where applicable, override previous implementations.
